

EQUIPMENT

Life's a whole lot easier
with a Dolphin in your pool!

- State of the art technology
- Environmentally friendly
- Scrubs and vacuums entire pool
- Saves 30 – 50% on operating costs
- For pools up to 15 metres

Dolphin

Orbit

It takes a Dolphin to deliver the most advanced pool cleaning technology...

It's a whole new world when robotics and pool cleaning collide...

The Dolphin Orbit lengthens the life of your filtration equipment because it scrubs, sweeps, vacuums and filters dirt and debris into a self-contained machine-washable filter bag, and not into the pool's filter system.

The Dolphin Orbit's powerful motor re-circulates your pool's water so that pool chemicals are distributed better. As a result, you'd use fewer chemicals and you swim in a more environmentally-friendly pool.

The Dolphin Orbit represents a real breakthrough in robotic pool cleaning technology. It scrubs and vacuums the entire pool surface – floor, walls, steps – all the way to the waterline and because it operates independently of the filter system, it can save up to 50% on electricity and backwashing costs, as well as up to 30% on chemicals.

- Scrubs, sweeps and vacuums entire pool
- Operates independently of Pool Pump and Filter
- Microfilters the pool water
- Exclusive corner cleaning movement
- Air Sensor – suitable for beach-entry pools
- Split Roller Brush for enhanced manoeuvring
- Suitable for all surfaces

If you want to know more about Dolphin Robotic Pool Cleaners visit the Maytronics website — www.maytronics.com or contact Poolrite Commercial Equipment Division.

Caddy available – optional extra.
